

# COMPANY PROFILE

## ABOUT US

The company was incorporated on March 3, 2005, and since its inception, it has achieved sustainable growth. Today, Heavy Force stands as a leading marine and offshore construction company specializing in executing complex infrastructure development projects for both the government and private sectors in the Maldives.

Although the company is in its 19th year of operation, its management team brings an average of 27 years of industry experience, specializing in various fields. As a professionally managed organization, Heavy Force is registered as a Class 1 contractor in harbours and marine construction under the Ministry of National Planning, Housing, and Infrastructure.

## OUR EXPERTISE

Heavy Force places significant emphasis on waterfront development, offering a wide range of services. Acting as a one-stop shop, we meet all project demands related to onshore and offshore activities. Our dynamic team of engineers and project managers is dedicated to delivering innovative solutions that address project requirements and operational challenges on time and within budget.

Our diverse portfolio of operations includes:

- Engineering and project management
- Dredging and land reclamation
- Waterfront construction
- Inland infrastructure development
- Logistics support
- Demolition and site cleanup

## RESOURCES AND CAPABILITIES

The operational team is equipped with an array of heavy machinery, including dredgers, pile-driving equipment, excavators, wheel loaders, dump trucks, landing crafts, barges, and workboats, enabling us to handle projects of varying scales and complexity.

With superior capabilities in technology, equipment, marketing, and manpower, Heavy Force consistently delivers prestigious services nationwide, solidifying its reputation as a renowned brand in marine and waterfront construction in the Maldives.

# VISION AND MISSION

## Vision

At Heavy Force, we aspire to be the preferred contractor in the Maldives for dredging, waterfront construction, inland infrastructure development, engineering and project management, and logistics support. We aim to set the standard for excellence and reliability in every project we undertake.

## Mission

Heavy Force is committed to meeting the needs of our customers and clients by building their confidence and trust while consistently enhancing the quality of our services. Our mission is to expand and diversify into growth areas to better meet customer demands by delivering innovative and sustainable solutions. We prioritize creating safe working conditions and fostering close cooperation with our clients. At Heavy Force, we also strive to be a responsible and active member of the economic and social community of the Republic of the Maldives, contributing to its development with integrity and accountability.

# CORE VALUE AND GUIDING PRINCIPLES

## **Employees**

The greatest asset of Heavy Force is its employees. Above all, it is their capabilities, experience, and teamwork that enable the successful delivery of our services and the achievement of the company's mission. Our priority lies in the recruitment, development, and retention of a skilled workforce tailored to our services. We empower our employees by providing them with the skills, resources, and authority to make informed decisions and excel in their roles.

## **Honesty**

At Heavy Force, we uphold the highest ethical standards and work together with integrity in every task we undertake.

## **Passion and Ingenuity**

We are passionate about what we do, taking the initiative and leading by example, always striving for excellence in every endeavour.

## **Safety**

Maintaining safe working conditions for everyone involved in our operations is our overriding objective. For all managers, supervisors, and staff, safety takes priority over any activity or deadline.

## **Risk Management**

Adhering to the principles of good corporate governance, we proactively assess major risks and implement effective mitigation strategies. Our management team regularly reviews corporate risks, while project managers and engineers ensure that risks within their respective projects are carefully evaluated and addressed.

## **Quality**

Delivering projects on time, within budget, and to specification, while satisfying customers and stakeholders, is critical to maintaining our reputation. At Heavy Force, we strive to ensure that all aspects of our operations meet the highest international standards relevant to the work being carried out.

## **Environment**

We are committed to excelling in compliance with national and international environmental statutory requirements, continually working toward sustainability and environmental responsibility.

# OPERATIONAL PORTFOLIO

## Engineering and Project Management

The employees and consultants at Heavy Force are skilled and qualified engineering professionals with extensive experience in supervisory, management, technical, and engineering roles. The engineering and project management team forms the core of our organization, specializing in the design, planning, organization, resource management, and execution of complex engineering projects to ensure their successful completion on time and within budget.

We collaborate closely with our clients to meet their unique goals and objectives, delivering beneficial change and added value through a comprehensive range of technical expertise and the application of disciplined engineering and project management methodologies.

Our primary focus lies within the civil engineering industry, where we work with reputable clients and contractors across the Maldives. Our services include, but are not limited to; **Dredging and Land Reclamation, Port and Harbour Construction, Public Infrastructure Development, Earthworks.**

In addition, our **Mechanical Engineering** team operates tirelessly to maintain our growing fleet of equipment and machinery in peak operational condition, ensuring seamless project delivery and minimizing downtime.

At Heavy Force, we take pride in our ability to deliver innovative and reliable engineering solutions, strengthening our reputation as a trusted partner in the industry.

## **Dredging and Land Reclamation**

Dredging and land reclamation are among the core business activities of Heavy Force. This process involves the removal of materials from the seabed or waterbed, typically to deepen navigation channels, ports, and waterways. In many cases, the dredged materials are repurposed for land reclamation, creating new land areas for development and infrastructure projects.

These operations are often carried out in close coordination with our waterfront construction projects, ensuring seamless integration and optimized outcomes. At Heavy Force, we leverage our expertise and specialized equipment to deliver efficient and sustainable dredging and land reclamation solutions that meet the unique needs of our clients.

### **Waterfront Construction**

Complementing our dredging operations, Heavy Force specializes in waterfront construction, playing a vital role in the development of national marine infrastructure and the protection of the Maldives' vulnerable islands.

Our expertise spans a wide range of waterfront construction services, including:

- **Construction of wharves, berths, marinas, ports, and harbours**
- **Coastal protection** (e.g., breakwaters and revetments)
- **Sheet piling works**
- **Beach refurbishment**
- **Rock boulder placements**
- **Geo-bag installation**

At Heavy Force, we are dedicated to delivering innovative, durable, and sustainable solutions that enhance the resilience of our coastal environments and support the growth of the Maldives' marine infrastructure.

### **Inland Infrastructure Construction**

Although Heavy Force specializes in marine and waterfront construction, the company also possesses the expertise and resources to deliver inland infrastructure development services that complement its core business. These services include; **Road Construction, Paving Works, Logistical Support for Resort Development Project.**

Heavy Force is committed to applying its technical proficiency and project management capabilities to meet the diverse infrastructure needs of its clients, ensuring timely and high-quality execution across all projects.

## Logistical Support

The logistics division serves as the backbone of Heavy Force, providing essential support for our large-scale, multidisciplinary construction and project management services. Our comprehensive logistical solutions include **Fabrication and Modularization, Offsite Pre-assembly, Procurement of Materials and Equipment, Marine Transportation of Bulk Cargo, Equipment Rental and Heavy Lifting, Salvage Operations, Customers Clearance, Decommissioning and Removal of Construction Waste, Transportation of Waste Between Locations.**

With a focus on efficiency and reliability, our logistics team ensures that all projects are executed seamlessly, enabling the smooth operation of construction activities and minimizing downtime. Heavy Force is committed to delivering timely and cost-effective logistical support to meet the diverse needs of our clients.

## WHY CHOOSE HEAVY FORCE?

- **Proven Expertise:** Decades of experience in marine and infrastructure development.
- **Innovative Solutions:** Tailored strategies for unique challenges.
- **Commitment to Quality:** Projects delivered on time and within budget.
- **Sustainable Practices:** Prioritizing environmental and social responsibility.

## Delivering trust, building relationships. Meet our loyal clients!

*Our Reputation Speaks: Trusted by the Maldives Government, SOEs, and Tourism Sector!*

# CORPORATE SOCIAL RESPONSIBILITY

## Committed to Supporting Local Communities

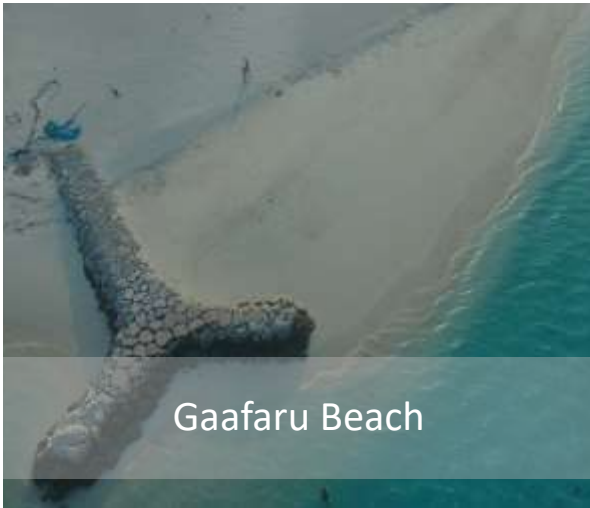

Heavy Force has a long-standing tradition of supporting the communities in which it operates. We strive to identify sponsorships and partnerships that resonate with the interests of local communities near our projects, as well as larger initiatives that align with our values-driven culture. Heavy Force undertook numerous voluntary activities to benefit these communities.

Guided by our corporate social responsibility (CSR) philosophy, we aim to contribute to projects that provide broad, long-term benefits to the community rather than focusing on individual gains. Our initiatives are designed to ensure that children, youth, and elders alike benefit from our efforts while promoting environmental sustainability.

With this commitment, we prioritize projects that address critical community needs, such as waste management, road improvements, and beach profiling. Through these initiatives, we aspire to foster sustainable development and enhance the quality of life for all community members.
